

How to use the paint repair set

- Step 01: Read and respect all necessary safety instructions (special site instructions, environmental protection instructions, safety data sheet of products etc.)
- Step 02: Roughen the damaged area with sand paper (grain size 100 to 180)
- Step 03: Clean the damaged area with clean cloth (and water if required) from dust, grease, oil etc.
- Step 04: Prepare the supplied paint repair set as follows

- Step 05: Protect areas that shall not be painted as well as the environment before you start the repair procedure !
- Step 06: Take a clean brush and repair the damaged surface.
- Step 07: Do not touch the repaired surface until it is dry. Wait minimum 3h if you want to do a second layer of paint.
- Step 08: Dispose paint residues, brushes etc. environmentally correct

Please note that the repaired surface may have slightly different colour because of different surface structure, gloss etc.
